Blessed G/Michael Catholic Secondary School

Semester 1 HP Mid1 Examination for Grade9

Academic Year: 2024 / 2018 E.C. Time Allowed: 1:30'

Name: _____ Grade & Sec: Grade9 _____ R.No: _____

I. Write 'True' if the statement is correct and 'False' if it is incorrect.

____ **1.** Nutrition is a chemical substance in our food.

____ **2.** Health is an optimal state of health and wellbeing.

____ **3.** Physical exercise is any body movement produced by skeletal muscles that result in energy expenditure.

____ **4.** Reaction time is the ability to develop the gap between message receiving and responding or taking action.

____ **5.** Our level of physical fitness performance is not constant.

____ **6.** Muscle type is a factor that affects physical fitness performance.

II. Choose the best answer among the given alternatives.

____ **7.** Who benefits from organizing a sporting event in one kebele, woreda, city or nation?

A. Hotel owners **B.** Transport owner **C.** Marketers **D.** All of the above

____ **8.** Who is benefited from gender equality in sports and society?

A. Female **B.** Males **C.** Nation **D.** All of the above

____ **9.** Which one of the following is not the result of technology in sport?

A. Video Assistant Referee (VAR)
B. Sport wear fabrics
C. Facilities and training equipment
D. Fans

____ **10.** Why do some athletes take prohibited performance-enhancing drugs?

A. For performance enhancement
B. For recreational use
C. For treating unverified medical conditions
D. All of the above

____ **11.** What is not an accurate mechanism to determine our true level of physical fitness?

A. By looking at external posture alone
B. By resting heart rate
C. By calculating body mass index
D. All of the above

____ **12.** Which physical fitness component tends to naturally decline directly with increasing age if not specifically trained?

A. Flexibility **B.** Strength **C.** Power **D.** Endurance

____ **13.** According to the caloric density per gram, which list is arranged in ascending order?

A. Fat - protein - carbohydrate
B. Carbohydrate - fat - protein

C. Carbohydrate (4 kcal) - protein (4 kcal) - fat (9 kcal)
D. Fat - carbohydrate - protein

____ **14.** Which one of the following is true about physical fitness?

A. When the level of physical fitness is improved, the resting heart rate decreases.
B. Our level of physical fitness does not vary from one person to another.
C. When you are fit, your energy intake is decreased.
D. When you are detraining, your performance remains constant.

____ **15.** Body Mass Index (BMI) is calculated as the ratio of a person's weight (in kg) to his or her:

A. Age **B.** Height squared (in m^2) **C.** Body fat percentage **D.** Lean tissue mass

____ **16.** Which statement best describes comprehensive physical fitness?

A. The ability to involve in one specific type of sport event
B. The ability to develop a single motor skill
C. The ability to perform without effectively and efficiently through our daily life span
D. None of the above

____ **17.** All of the following are skill-related components of physical fitness EXCEPT:

A. Agility **B.** Speed **C.** Power **D.** Flexibility

____ **18.** In 1 g of fat and 1 g of protein, how many total calories (kcal) are found together?

A. 9 kcal **B.** 4 kcal **C.** 10 kcal **D.** 13 kcal

____ **19.** Which pair represents health-related physical fitness components?

A. Agility and Reaction Time
B. Speed and Coordination
C. Flexibility and Cardiovascular Endurance
D. Balance and Power

____ **20.** What are the three primary energy-yielding macronutrients in human food?

A. Vitamins, Minerals, and Water
B. Carbohydrates, Proteins, and Fats
C. Calcium, Iron, and Sodium
D. Fiber, Amino Acids, and Enzymes

____ **21.** If a student has a weight of 100 kg and a height of 2 meters, what is their BMI?

A. 20 kg/m^2 **B.** 25 kg/m^2 **C.** 30 kg/m^2 **D.** 50 kg/m^2

____ **22.** If a balanced dietary plan consists of 1,000 g of food daily and allocates 30% to healthy fats, how many grams of fat should be consumed?

A. 150 g **B.** 200 g **C.** 300 g **D.** 400 g

____ **23.** If the same 1,000 g dietary plan allocates 57% to carbohydrates, how many grams of carbohydrates should be consumed?

A. 450 g **B.** 500 g **C.** 570 g **D.** 600 g
